

When professional credentials are required for key occupations

PEARSON VUE

Global Credentialing Solutions™

Leading organisations around the world depend on Pearson VUE to implement and administer their high-stakes testing programs. We help credentialing programs of all sizes implement comprehensive solutions to enhance the performance, reliability, reach and security of their testing program. Our global credentialing solutions help certifying bodies establish a presence in countries where training and education are becoming top priorities both in the private and government sectors.

Complete Credential Development and Administration

Protecting Consumers

As the world's citizens become increasingly mobile, consumers rely on — and demand — professional credentials to signify a standard level of competency among health care practitioners. Certification can help ensure that whether you're in New York or Mumbai, you're receiving competent, qualified care. Requiring health and safety personnel to achieve professional credentials benefits everyone:

- Certificate holders have demonstrated a certain level of skill, increasing opportunities for career advancement.
- Consumers are safeguarded against being treated by untrained or incompetent practitioners—this not only protects local citizens, but helps encourage tourism.
- Employers can more readily identify which individuals are truly qualified for a position.
- Governments can more easily ensure the safety of their citizens.

When professional credentials are required for key occupations, the local economy profits as well. Residents and visitors alike are more confident about seeking care when they know their welfare is being safeguarded. Without credentialing standards in place, those who can afford it may seek treatment elsewhere—at the expense of the local economy.

Pearson VUE: The Leader in Global Credentialing

Pearson VUE Global Credentialing Solutions can help you with everything from test development to exam delivery to license administration. We'll assign a team of experienced professionals to manage every aspect of your high-stakes testing program. We've helped a number of credentialing programs find new markets, expand programs, and convey the importance of lifelong professional development. Our commitment to exceptional service means you can be assured that your program will operate smoothly and effectively.

Our clients include:

- National Council of State Boards of Nursing (US)
- Health Authority of Abu Dhabi
- Royal College of Physicians (UK)
- National Registry of Emergency Medical Technicians (US)
